For over 30 years Konig has been producing wheels for the streets, shows, track and off-road. Everyone at Konig takes a great deal of pride in developing the highest quality product available on the market today. Each wheel is designed with the most up to date and state of the art technology that represents decades of experience. Wheel after wheel and car after car, Konig continues to produce wheels that are second to none. Other companies may come and go but there is a reason Konig has remained a fixture in the automotive industry. Our commitment is to you, our valued customers, partners, and friends. Thank you for all of your support!

WHAT IS FLOW FORMING?
FLOW FORMING TECHNOLOGY INVOLVES THE APPLICATION OF PRESSURE TO THE INNER BARREL OF THE WHEEL, WHILE SPINNING & AFTER IT HAS BEEN CASTED. THIS PROCESS SHARES SIMILARITIES TO THAT FOUND IN THE FORGING PROCESS. THE ALUMINUM MOLECULES ARE COMPRESSED RESULTING IN A LIGHTER & STRONGER WHEEL WITH GREATER SHOCK RESISTANCE & ELONGATION PROPERTIES (PG. 6).

MORE ABOUT FLOW FORMING TECHNOLOGY ON PAGE 6
**INTERFORM**

The INTERFORM is a split 5-spoke design that is constructed through the use of the Flow Forming process. The final product is lighter, stronger and available for vehicles that desire a sport-tuned wheel.

**FEATURES & SIZING**

- 5 LUG
- LIGHT WEIGHT
- FLOW FORMED

18" | 19" | 20"
---|---|---
18x8 | 19x8.5 | 20x8.5
18x9 | 19x9.5 | 20x9.5

**INTEGRAM**

The INTEGRAM is an aggressive, tuner-inspired, mesh design crafted with precision and exacting standards. The Integram is developed utilizing Flow Forming Technology resulting in a much lighter and stronger wheel.

**FEATURES & SIZING**

- 5 LUG
- FLOW FORMED

17" | 18" | 19"

MORE ABOUT FLOW FORMING TECHNOLOGY ON PAGE 8
The MILLIGRAM is a Flow Formed, 10-spoke design with a machined undercut and Konig’s unique dual lightening hole PCD offered in gold or matte black. The Centigram is one of the elite Flow Formed wheels offered by Konig that offers increased strength and a lighter wheel.

### MILLIGRAM

- **5 LUG**: Light Weight Flow Formed Low Offsets
- **18”**: 18X8.5 18X9.5 18X10.5
- **GOLD with MACHINED PCD**
- **MATTE BLACK with MACHINED UNDERCUT**

### FEATURES & SIZING

The CENTIGRAM is a 5-spoke design with a machined PCD with Konig’s unique dual lightening holes, and is offered in matte black and gold finishes. The Centigram is one of the elite Flow Formed wheels offered by Konig that offers increased strength and a lighter wheel.

### CENTIGRAM

- **5 LUG**: Light Weight Flow Formed Low Offsets
- **19”**: 19X8.5 19X9.5 19X10.5
- **GOLD with MACHINED PCD**
- **MATTE BLACK with MACHINED UNDERCUT**

### FEATURES & SIZING
FLOW FORMING ADVANTAGES

The strength of a flow formed wheel is substantially stronger than a typical cast constructed wheel. On average, a 20% - 30% increase in tensile strength can be seen on various parts of the wheel over a conventional cast wheel. This works great for every day road hazard and racing applications alike.

Flow Forming Advantages

Flow forming technology has a great number of benefits. One of those benefits is an end result with approximately 25% (on average) weight savings when compared to a conventional cast wheel with similar specifications. While having a lightweight wheel is most notably sought after by racers to remove un-sprung weight, this same theory applies to any vehicle. Being able to reduce a vehicle’s un-sprung weight doesn’t just offer better throttle response and power; it also lends itself to increased fuel mileage.

Snap the QR Code or visit: FacesOfKonig.com/350z to listen Caesar Martinez talk about choosing the right parts for the track. #facesofkonig
